

Newsletter March 2025

We have some exciting news to share about Dipendra School. In one month, we will start the new school year with Grade 7. The construction of this classroom has been completed, and it has been furnished. During a meeting with the municipality, it became clear that they are very pleased with the developments at the school. They have committed to a financial partnership with our foundation for the coming years and will cover the salary of the new Grade 7 teacher. Additionally, the municipality intends to annually expand this school with us up to Grade 12. In Nepal, this means that students will complete their secondary education after Grade 12.

Over the past weeks, there has been intensive work to realize the classroom..

Currently, a computer lab is being built on the first floor. Due to the earthquake susceptibility, bamboo is extensively used in the construction of the upper floor. This material is both lightweight and flexible.

Here is the current view of the school.

An impression of what the school could look like in the future. If you would like to support us in these plans, you can do so via: NL75 RABO 013.60.79.423
